

WICKETED BAG BUILDER

Laddawn's new Wicketed Bag Builder is the industry's simplest way to price, order and secure custom wicketed bags. The online tool is ideal for creating bags for fresh produce, baguettes and beyond; you can even add graphics and text to your design using the Print Designer feature.

This Wicketed Bag Builder will save you valuable time by visually guiding you through a quick selection of specifications, and then by providing you with an instant quote to save or share with your customer. You can also quote printing, by adding artwork, text or a placeholder, all in the same transaction, in just minutes.

Get started by selecting Poly Bags, and selecting the Wicketed Bag category:

1. Specify your bag dimensions such as width, length and gauge of bag
2. Enter your desired bottom gusset depth
3. Enter your desired lip length
4. Select your desired bag release type, either perforated lip or tear starts
5. Select a wicket length between 3'-6"
6. Select the wicket width (space between wickets) between 3"-9"
7. Select the cardboard header type, either front, back, both or none
8. Select bags per wicket from a range of 100-350 bags

The custom bag is now complete! You can either process and receive your immediate custom quote or click on Print to utilize the Print Designer to add your graphics, text or placeholder, and then receive your quote.

PRODUCT FEATURES

- ▶ Expanded, intuitive quoting tool includes multiple relevant specifications to ensure quoting and order accuracy
- ▶ Unlimited custom sizes and printing combinations to meet your customer needs
- ▶ Online quoting and design tools to help you deliver immediate custom quotes
- ▶ Seven stock sizes currently available, with new sizes and materials coming in May

Customers can still call Customer Experience representatives for custom quoting if they have additional or unusual requests and need further assistance.
