BRANDIT PROGRAM

BrandIt is an exclusive distributor program that puts *your* contact information – not ours – on every stock or custom item you purchase from us. Small order or large order, it doesn't matter. Your logo and company info are right there on a label, on every box we ship to your customer.

Best part? We do it for you at all of our manufacturing facilities at no cost. All you need to do is send your high-resolution logo to your Laddawn rep and your part is done. No logo? No worries. We have a solution for you there, too.

CUSTOMIZABLE

It's not just your logo we can put on your label. If you want your own item numbers on your label instead of ours, we can do that. Want to set up Brandit for a big customer and put their logo on it? We can do that, too. PO numbers? That, too.

MORE BRANDING

Because putting your brand in front of your customer as often as possible increases your customers' loyalty, Laddawn has also integrated the Brandit feature into the time-saving tools on Laddawn.com. For example, quotes you send to your customers through Laddawn.com include your logo as well.

ACCURACY

Because your orders are barcode controlled from the time they are generated until they ship, you have additional peace of mind in knowing that the chance for most shipping errors are eliminated. The barcodes prevent common order issues like short-shipments, over-shipments or shipment of the wrong product.

ACCOUNTABILITY

BrandIt also makes solving problems easy, because every action we carry out with your order is recorded in detail on a shipping log. Barcode technology makes this possible. With more information available on all your orders, BrandIt helps you give and receive better service.

SAVINGS

Accurate orders. Delivered on time to the right location. Easy, free and beneficial branding for your business. All these benefits add up to savings. We're guessing you'll like that.
